The RE:Think Your Profession Challenge 2025 – Now Open!

This autumn marks the start of the RE:Think Your Profession Challenge 2025, inspired by the values of the New European Bauhaus (NEB):

-  Beautiful – creating projects that inspire and uplift
-  Sustainable – protecting people and the planet for the future
-  Together – making solutions inclusive and community-driven

Read our blog post for more information here:

What it means for teachers

As a teacher, you can become a Team-cher – a guide and mentor for student-driven innovation. With support and resources, you will help your students explore real-world challenges, develop ideas, build prototypes, and present their solutions to stakeholders.

What it means for students

Students will:

-  Learn by doing
-  Collaborate in teams
-  Think creatively
-  Solve real problems that matter in their schools and communities

The Challenge is based on Challenge-Based Learning (CBL) – an active, student-centered method that fosters critical thinking, creativity, communication, and collaboration.

THE LAST 6 MONTHS

Official Website Launch

The TEACH project website is now live and serves as the central hub for updates, events, and educational materials.

 Click here to visit us:

NEB Challenge: Official Launch

VET schools across Europe are invited to apply CBL to real-life issues related to beauty, sustainability, and inclusion. The Challenge promotes civic engagement, creativity, and meaningful collaboration.

 Learn more about the New European Bauhaus here:

☒ Social Media Campaigns

Our online presence is growing with regular updates, visuals, and project news shared on Facebook, Instagram, and LinkedIn. A dedicated campaign promoted the NEB Challenge and significantly increased visibility among educators and stakeholders.

📊 Estimated reach: 336+ people engaged through posts and shares.

Recruiting VET Teachers & Teams

Through email campaigns, local events, and a targeted paid promotion on Facebook, we have successfully reached VET schools and received interest from teachers who are eager to participate with their student teams. Materials were distributed, and tailored guidance was offered to support their registration.

CBL Toolkit & Learning Platform – In Progress

Partners are preparing and translating educational materials that will soon be available on the TEACH digital platform.

The Toolkit will provide practical resources to support teachers in implementing CBL in class and online.

Tips & Tools for the Classroom

Want to start with Challenge-Based Learning in your class? Here are some simple first steps, inspired by the official CBL framework:

1. Engage – Choose a Big Idea with your students
2. Investigate – Work together to ask questions, research, and connect with people affected by the issue.
3. Act – Design, prototype, and share solutions that can make a real impact

 More tools and resources will soon be available in the TEACH CBL Toolkit on www.teachnext.eu.
